

MJ (Minjeoung) Neev

Senior Credit Risk Analyst · Quantitative Finance & ML.

Ann Arbor, MI (231) 489-4195 · laminjon@gmail.com

SUMMARY

Credit risk professional with 6+ years in CECL execution, PD/LGD/EAD modeling, and stress testing across commercial and consumer portfolios. Skilled in Python, R, SAS, and SQL. Holds an M.S. in Data Science at Northwestern (GPA 4.0) with applied experience building AI/ML systems.

EXPERIENCE

Huntington National Bank | AVP — Sr. Allowance Credit Risk Analyst Sep 2023 – Present · Detroit, MI

- ▶ Led quarterly CECL execution integrating macroeconomic scenarios (unemployment, HPI, rates) with internal data; prepared management overlays and board documentation aligned with CECL policy.
- ▶ Built PD/LGD/EAD and prepayment/curtailment models using SAS, R, and Python on large SQL databases; engineered features, ran sensitivity tests, and developed audit-ready reproducible SQL.
- ▶ Collaborated with Model Development, IT/Data Engineering, and MRM on production runs, back-tests, and challenger comparisons; monitored thresholds to ensure regulatory compliance.

GM Financial | Commercial Risk Analyst II / I Jun 2019 – Sep 2023 · Detroit, MI

- ▶ Designed risk indices evaluating \$10B+ in floorplan dealership exposure; contributed to quarterly CECL loss allowance and asset/reserve forecasting using internal trends and economic indicators.
- ▶ Supported scorecard development (data collection, EDA, model estimation) using SAS and R; built Excel-based allowance models across macroeconomic scenarios; ensured SOX compliance controls.

EDUCATION

Northwestern University | M.S. in Data Science Mar 2026 · Evanston, IL

- ▶ GPA: 4.0 / 4.0 · Courses: AI & Deep Learning, Practical ML, Supervised Learning, Applied Statistics with R, Python for Data Science.

Oakland University | Graduate Certificate — Business Analytics Aug 2023 · Rochester, MI

- ▶ GPA: 3.96 / 4.0

Central Michigan University | B.S. in Statistics May 2019 · Mt. Pleasant, MI

- ▶ GPA: 4.0 / 4.0 · President's List

SKILLS

Languages	Python (Pandas, NumPy, Scikit-learn, Keras, TensorFlow), R, SAS (Certified), SQL, Excel VBA
Credit Risk	CECL / ALLL, PD / LGD / EAD, Stress Testing, Scorecard Development, Back-testing, Scenario Analysis
Analytics	Feature Engineering, ETL, EDA, Sensitivity & Attribution Analysis, Data Visualization

PROJECTS

Tend — AI Credit Card Rewards Assistant · Northwestern MSDS Capstone, 2026

- ▶ Designed core AI capabilities for a team-built RAG-powered decision support tool: conversational benefits Q&A, purchase-card recommender, and location-aware offer discovery grounded in the user's actual card data.
- ▶ Owned product design end-to-end: AI feature workflows, Figma UI prototyping, backlog, and roadmap across a 10-week sprint.

Credit Default Risk Modeling

- ▶ Compared traditional statistical models vs. deep learning (LSTM, neural nets) for loan default prediction; evaluated via AUC-ROC, KS statistic, and Gini coefficient on imbalanced datasets.
